Elicit, document and manage stakeholder requirements to meet business and project objectives

Elicit, document and manage stakeholder requirements to meet business and project objectives

Planning for Analysis

Analysis seeks to:

Better understand information

Improve quality of information

Complete knowledge of information

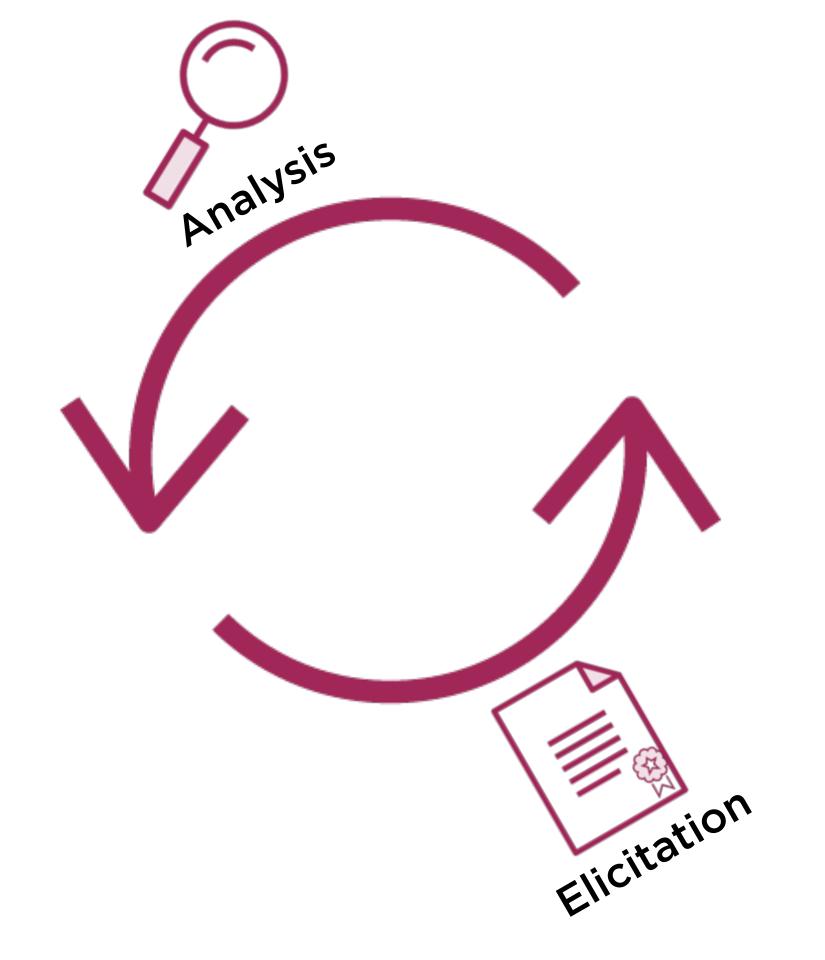

Helpful to begin considering early on what models, tools might be of greatest use

Determine if a standard modeling language or set of tools are used in the organization

Set guidelines in advance to help sort valuable information from distractions

Think about how analysis may impact future elicitation efforts
